sms77 has a new base of operations

September 4th, Kiel. Since 01 September 2019, the new company headquarters is located in downtown Kiel.

On 01 September 2019 sms77 moved to a new and larger office in Kiel. For three years, the communications company, which specialises in professional SMS solutions, has been based in Melsdorf near Kiel.

In order to be prepared for the future and to enable further continuous growth, the company looked around for new premises and found what it was looking for in the centre of Kiel.

The new office is not far away from the previous location, which made a relatively quick move possible. A big advantage of the new location is the excellent connection to the public transport as well as sufficient space for future enlargement of the team.

The employees benefit from the large and bright rooms and the employee-friendly equipment as well as from short communication paths. Shopping possibilities "directly in front of the door" and the central location complete the picture.

Since 01 September sms77 can be found at the following address:

sms77 e.K.
Willestr. 4-6
24103 Kiel

There will be no changes to the other contact options for customers. Telephone, fax and e-mail remain as before.

The sms77 team is pleased about the new office, which offers them many new opportunities for growth and further development.
