Communication
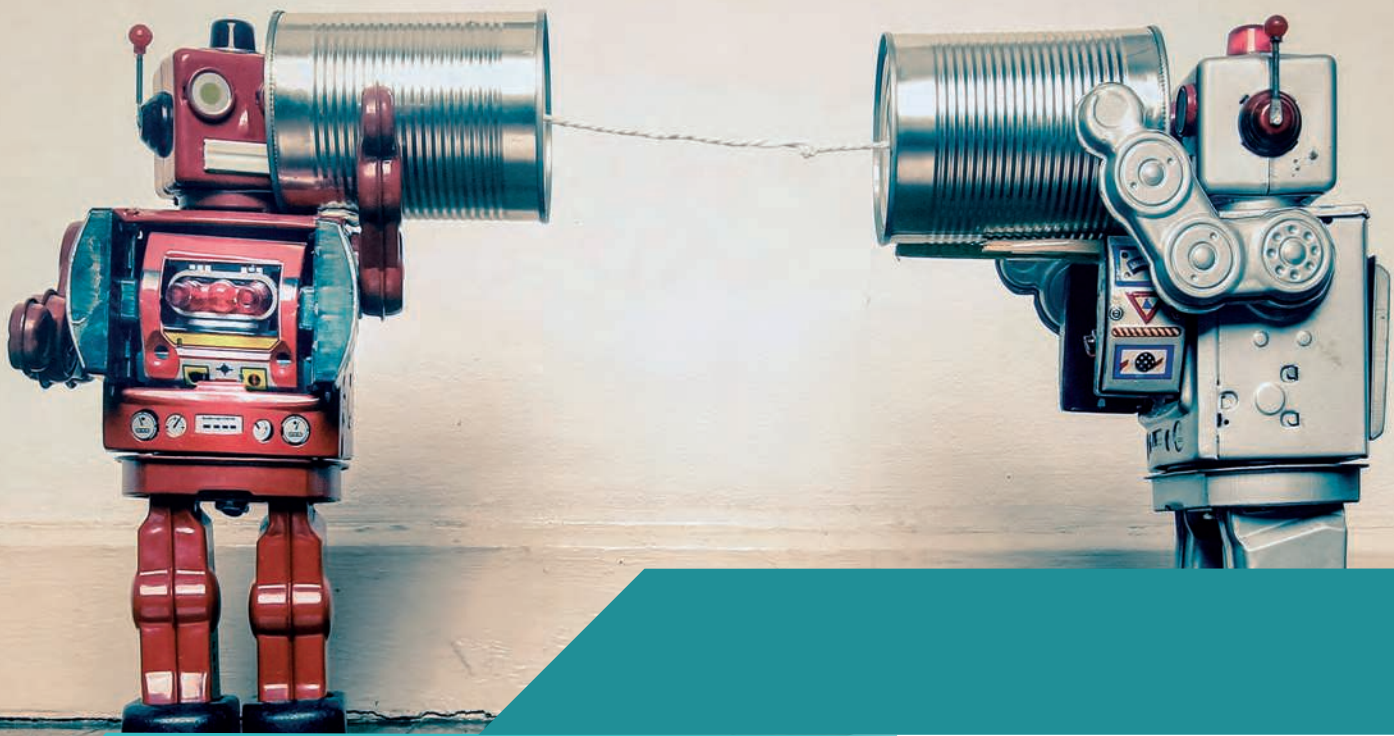

WORKS for those **WHO WORK** at it

seven

SMS Gateway
for the Business Class

We are a CPaaS. And high level communicators.

seven is located in Kiel and started 2003 with a range of sophisticated products to send and receive SMS. Over the years, the portfolio has been repeatedly adapted to technical developments and now offers individual as well as freely scalable solutions in order to realize communication at all levels.

In the course of the company history as well as our own set aims, a focus on business areas has crystallized. Accordingly, we provide high-quality and effective services to our customers, dedicating ourself to their specific requirements and suggestions.

Throughout the DACH area up to far beyond international borders, thousands of customers already trust our competence. Your messaging applications are enriched by seven with clear added value, because it helps you to communicate at a high level.

A team with passion

technically experienced employees who are committed to contributing their ideas and holistically solving projects

Flexibility internally & externally

Long-term customer satisfaction above all requires reliability and competence at all levels

Professional CPaaS solutions

Communication Platform as a Service, that means cloud-based collaboration beyon netzwork boundaries

seven

Messaging products to send & receive messages

Interfaces seamlessly integrated. Reliable and fast.

We offer various APIs to send messages via our gateway in direct server-to-server connection: Out of your application, via the seven webapp or simply on the go via seven-cli - the tool for triggering preconfigured SMS. Numerous features mobilize your daily communication routine, your SMS campaign, projects and much more.
